Putting European transport on track for the future
Through the implementation of this strategy, we will create an irreversible shift to zero-emission mobility while making our transport system more efficient and resilient.

EUROPEAN COMMISSIONER FOR MOBILITY AND TRANSPORT ADINA VĂLEAN
The European Green Deal calls for a 90% reduction in greenhouse gas emissions from transport by 2050, to help the EU become the first climate neutral continent.

To this end, the Commission announced a Strategy for Sustainable and Smart Mobility to be adopted in 2020.

In the meantime, transport was amongst the sectors hardest hit by the Coronavirus pandemic.

It has shown that we need to continue to work on the future of our European transport system so that it can quickly recover from the severe impact of this crisis.

We need to set out much needed reforms, policies and actions to support the sector.
The Strategy

Our vision for the future of European transport and mobility

KEY ELEMENTS

• **Three objectives:** making the European transport system more sustainable, smart and resilient
• **10 flagship areas** with key milestones
• **Action plan** with a list of concrete policy actions
• Comprehensive **Staff Working Document**
Milestones – 2030/35

By 2030

• Min. 30 million zero-emission cars and 80 000 zero-emission lorries in operation
• Min. 100 climate neutral cities
• Scheduled collective travel under 500 km should be carbon-neutral within the EU
• Doubled high-speed rail traffic, rail freight traffic increases by 50%
• Transport by inland waterways & short sea shipping increases by 25%
• Rail & waterborne-based intermodal will be able to compete on equal footing with road-only transport in the EU
• Paperless freight transport
• Automated mobility deployed at a large scale
• Integrated electronic ticketing
• Operational multimodal Trans-European Transport Network equipped for sustainable and smart transport with high speed connectivity (core network)
• Zero-emission ocean-going vessels ready for market

By 2035

• Large zero-emission aircraft ready for market
Milestones – 2050

By 2050

• Nearly all cars, vans, buses as well as new heavy-duty vehicles will be zero-emission
• Doubled rail freight traffic, tripled high-speed rail traffic
• Transport by inland waterways & short sea shipping increases by 50%
• External costs of transport within the EU will be covered by the transport users
• Death toll for all modes of transport in the EU close to zero
• Operational multimodal Trans-European Transport Network equipped for sustainable and smart transport with high speed connectivity (comprehensive network)
AN IRREVERSIBLE SHIFT TO ZERO-EMISSION MOBILITY

• Making all transport modes more sustainable,
• Making sustainable alternatives widely available in a multimodal transport system,
• Putting in place the right incentives to drive the transition.
