

Monitoring waiting time at WB internal borders (May - June 2021)

Since the Joint proposal prepared by TCT Permanent Secretariat and CEFTA Secretariat to facilitate the transport and trade of essential goods within the Western Balkans, we have been monitoring the waiting times at the borders in close cooperation with the respective authorities.

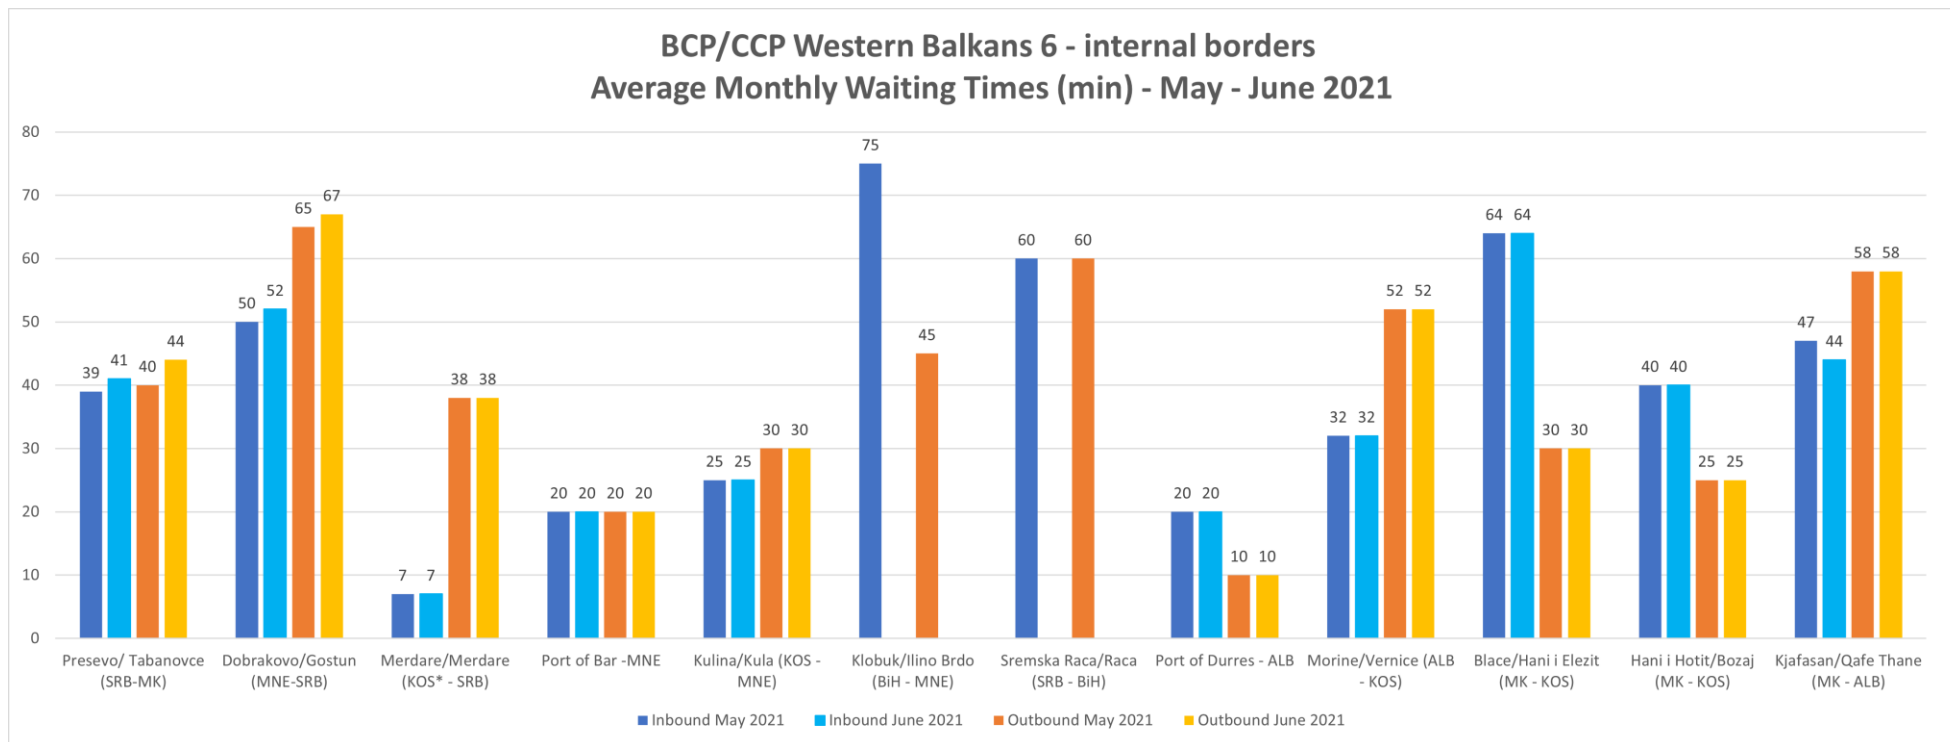

Daily monitoring has shown no major jams at Western Balkans internal borders during the past 2 months. During June 2021, the waiting times across the region have remained stable, however with several increases. **Presevo/Tabanovce** was one of them, showing slight increase in waiting times on both directions and **Dobrakovo/Gostun** was another, showing a greater increase in both directions (shown in table 2).

Note: data for **BiH** has not been delivered throughout the entire month of June, therefore waiting times could only be followed according to SRB data. Based on SRB data, there was a significant increase of waiting times on **Sremska Raca/Raca** during the second week of June (+36min), however this increase did not last for a long time, since the data showed that the waiting times returned to usual the next week.

1. WB6 Internal borders – Average Monthly Waiting Times (June 2021)

2. WB6 Internal borders – Average Monthly Waiting Times (May vs. June 2021)

3. WB6 Internal borders – Inbound/Outbound waiting times distribution range (May, June 2021)
