AMZS SAFE DRIVING CENTRE in VRANSKO

AMZS

AMZS SAFE DRIVING CENTRE in VRANSKO

Since the opening in the 2008 the following number of drivers take a course of safe driving:

- ✓ more than **200.000 car drivers** in 15 years;
- ✓ more than **10.000 motorcycle** riders in 15 years;
- ✓ more than **6.000 professional drivers** (trucks and buses);
- ✓ more than **1.700 drivers of special vehicles** (ambulances, firefighter vehicles, ..);

AMZS SAFE DRIVING CENTRE in VRANSKO

- ✓ We host more than **30.000 participants a year**, the number is increasing.
 - ✓ We organize over **80 events** annually.
 - ✓ We have more than **500 Slovenian companies**, who trust in our knowledge and professionalism.
 - ✓ 9 out of 10 participants recommend AMZS Safe Driving Centre
- EXCEEDED EXPECTATIONS.**
- ✓ We are flexible and committed to provide a higher security in traffic and a better drivers in different categories.

The logo consists of the letters "AMZS" in a bold, black, sans-serif font, centered within a solid yellow square.

COMMERCIAL PROGRAMS

- PRIVATE CARS
- MOTOR VEHICLES
- GOODS VEHICLES AND BUSES
- SPECIAL-PURPOSE VEHICLES

 **1987**

AMZS

AMZS safe driving programs for drivers:

Our programs are carefully designed for the simulation of daily events that can lead to different critical real-life situations on the road.

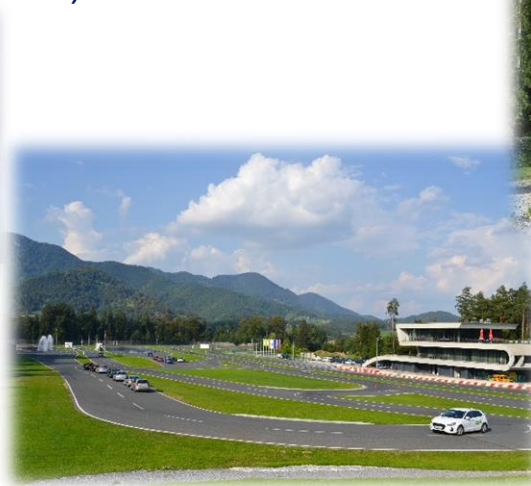

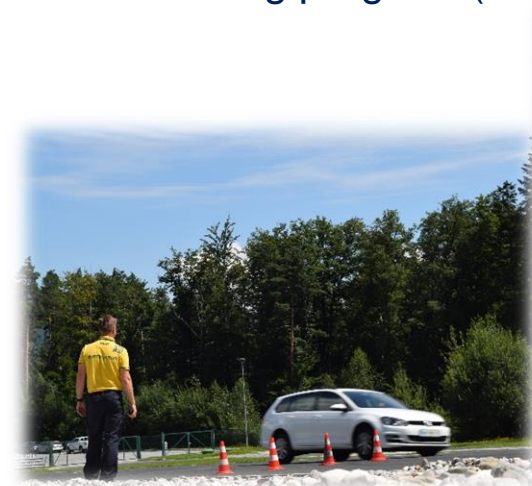

Because safety comes first.

We have earned the trust of more than 15,000 drivers.

Programs:

Intensive course, Advanced course, Individual training, Economical driving course, Additional training program for novice drivers, Additional safe driving training program (deletion of penalty points).

“A great experience, a real school, and good instructions for life. I recommend it to everyone. None of us is such a good driver that we could not become even better. Above all, this experience brings you down to earth as you realize what can happen on the road, and whether you are able to react correctly during these moments.” Mateja Štefančič, driver

AMZS

AMZS safe driving programs for motorcyclists:

Sooner or later every motorcyclist faces a critical situation on the road which can lead to serious consequences.

„Despite my long-term practice of driving motorcycles, I learnt some important techniques during the course.“

Janez Mavri, motorcyclist

Join over 3.000 motorcyclists who recognize the importance of safety in our safe driving courses, annually.

Programs:

Intensive course, Intensive course with a front passenger, Trial motorbike course, Refresher course, Advanced course, Individual training, "Safe on the roads" program, Young motorcyclist – scooter program.

AMZS

AMZS safe driving programs for goods vehicle and bus drivers

Professional drivers bear great responsibility. Professionalism, composure and safety – all these virtues are perfected at the AMZS Safe Driving Centre to every last detail.

That is why we have earned the trust of more than 600 professional drivers.

Programs:

Intensive safe driving course for goods vehicles and buses, Advanced safe driving course for goods vehicles and buses, Economical driving course, Gaining initial qualifications (code 95), Periodic training of drivers.

AMZS professional programs:

Rescuers, fire-fighters, armed forces, policemen operate specialized vehicles and therefore require special skills.

Programs are tailored to the requirements of the job they perform.

More than 1,700 drivers of special vehicles have already undergone our training course.

To ensure **our lives are even safer in their hands.**

“As a fire-fighter I have to be constantly prepared to offer my assistance in any event, no matter the circumstances on the road. During the course in Vransko we were able to test driving on different surfaces in the most demanding conditions. I have managed to successfully translate the experience gained during the course into our emergency interventions, so I would definitely recommend this course to all drivers of higher categories.”
Aleš Švarc, a fire-fighter from the Šoštanj-Centre Voluntary Brigade

AMZS

AMZS customized programs:

Commentary drive – learning during real-traffic driving with commentary/an assessment from an instructor.

Defensive driving – learning how a driver may be able to recognize, prevent and resolve different situations on the road (Shell Adria d.o.o. – we obtained a Shell certificate and gained the relevant accreditation to carry out the appropriate programs).

Driver behavioral analysis – recognition and analysis of a driver during real traffic. Since every driver is specific.

Program for seniors

Program for children's

AMZS customized programs:

All-terrain vehicle program

Mobile home drivers program

Dynamic driving with Andrej Jereb

"Old-timer" program

and many others.

LEGALLY PRESCRIBED PROGRAMS:

- **Additional training programme for novice drivers**
- **Additional safe driving training program (deletion of penalty points)**
- **Program for gaining initial qualifications and periodic training for professional drivers**

1987

AMZS

Additional training program for novice drivers

Excerpt from: Article 39 of the Drivers Act

A novice driver must attend the additional training program after a minimum 6 months and up to a maximum of 24 months (or until the driver has reached the age of 21) after being issued a drivers license. Over the first few months of driving, drivers are made aware of the consequences and the most frequent reasons for various risks and hazards on the road. Recognition of one's own driving skills and the detection and anticipation of risks and dangers during driving is a prerequisite behind the logic of attending a novice driver program.

We recommend that a novice driver does not attend such course prematurely before independently accumulating a few thousand kilometers driven. However, novice drivers should also not attend such course too late. The program must be completed before the drivers license ceases to be valid. This will enable the immediate extension of their drivers license and avoidance of complications due to any protracted waiting period to attend the program; participation being obligatory for the extension of the validity of their drivers license.

<https://www.uradni-list.si/1/content?id=101703>

The logo for AMZS (Association of Motor Vehicle Users of Slovenia) is displayed in a yellow square. It consists of the letters "AMZS" in a bold, black, sans-serif font.

Additional training program for novice drivers

- ✓ 3 X 45-minute psychosocial workshops sessions
- ✓ 1 X 45-minute theoretical session and discussion with a safe driving instructor
- ✓ 6 X 45-minute practical training sessions

“Especially useful, primarily for young drivers who, in most cases, find themselves in critical situations for the first time, and with the help of qualified instructors gain knowledge as to how to deal with such situations.”

Jan Pirnat, driver-beginner

Watch a few of the many inspiring stories in our video.

FACTS:

- ✓ 70,500 hours of psychosocial workshops
 - ✓ 23,500 theoretical training hours
 - ✓ 141,000 practical training hours
- ✓ 23,500 safe driving course novice drivers

All in the name of safety.

AMZS

Additional safe driving training program – for the deletion of penalty points

Program for all who have accumulated **between 4 and 17 penalty points**.

Description of the process:

- ✓ **4 X 45-minute psychosocial** workshop sessions
- ✓ **8 X 45-minute theoretical sessions and discussions** with a safe driving instructor
- ✓ **6 X 45-minute practical training sessions**

An individual may decide to attend the program voluntarily only once every two years.

Program for obtaining initial qualifications and periodic training for professional drivers

Obtaining initial qualifications and code 95

Every professional driver performing the public transport of goods with a good vehicle exceeding 3.5 tonnes requires an initial qualification

After passing the test, candidates receive a certificate based on which the relevant administrative unit enters **code 95** for a period of 5 years on their drivers license. The validity of the code is extended through periodic training, i.e. 35 hours of periodic training every five years or 7 hours of training annually.

FACTS:

- ✓ more than **500 hours of practical training**
- ✓ more than **3,600 hours of test preparation**
- ✓ more than **230 passed tests by professional drivers**
- ✓ more than **4,000 professional drivers** passed the initial driver CPC qualification for the public transport of passengers and goods

More than just a professional qualification and more than safety.

EVENTS

 **1987**

AMZS

AMZS as an event organizer:

Together we have been creating news for seven years now

- **Presentation of different vehicle models**
- **Presentation of different tires**
- **Events tailored to clients**
- **Team building**
- **Lease of the conference hall and classrooms**
- **Meetings**
- **Guided tours**
- **Social events**
- **Pre-New Year, unforgettable celebrations**
- **Catering events**

Always accompanied with the smell of petrol.

AMZS

STANDARDS FOR SAFE DRIVING CENTRES

Infrastructure

Programms

People

Above all, it is important to focus on the following:

- the setting of standards that will ensure **high quality work**,
- ensuring that contents meet **professional standards**,
- the **sharing** of experience related to building training tracks,
- the sharing of **staff knowledge** and **experience related** to safe driving exercises,
- improving road safety,
- the **uniform appearance of legislative material** related to road traffic.

AMZS Safe Driving Centre **cooperates with multiple governmental** and **international institutions** – universities, institutes and other European associations dealing with driver and traffic related problems.

The logo consists of the letters 'AMZS' in a bold, black, sans-serif font, centered within a solid yellow square.

THE GOAL AND PURPOSE OF COOPERATING

The primary goal is to make sure that safe driving centres provide **high quality services**, which we can ensure by coming to an agreement on the following:

CONTENTS:

- core programs and work methods,
- standard program types,
- course materials;

PHYSICAL STRUCTURES AND FEATURES:

- standard training track design features,
- minimum standards in terms of size, range of features and capacity;

STAFF:

- instructor training,
- conditions for the certification of instructors,
- annual updating of instructor knowledge,
- the exchange of instructors and knowledge.

The focus is mainly on:

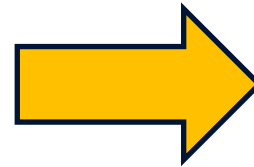

- the comprehensive **education and training of drivers in all areas** of road traffic with particular emphasis on the interaction of road users, risk awareness and road hazard perception;
- defining **norms and standards for building** driver training tracks;
- defining the **content criteria** for the delivery of top **quality courses**;
- generating **expert knowledge**, developing **content**, and also **staff development** (instructors, psychologists etc.);
- quirkier, more uniform and efficient **implementation of legislation**
- **exchanging information** and **best practices** between Safe Drive Centers and **introducing them to the governmental organizations** with portfolio in the area of safety and mobility;
- the **organization of special international promotional events** that will contribute to the development of activities in the field of road safety and mobility (safer infrastructure, educational programs for different target groups etc.);
- **collaboration, cooperation and networking between clubs**;
- the **exchange of information, knowledge and experiences**.

DRAFT PROPOSAL

- With the assistance of FIA guidelines, a special assessment scheme can be designed for safe driving centre. Set guidelines would assist in establishing a system of quality control.

FIA guidelines for:

- designing course content,
- building training tracks,
- designing courses for the training and certification of instructors.

(5-star rating system)

AMZS

PROCESS FOR ACHIEVING COMMON STANDARDS

Proposed sequence of activities:

1. an analysis of the current situation;
2. the harmonization of a set of minimum standards in a joint proposal;
3. the preparation of a proposal to create a new set of FIA guidelines;
4. the setting up of a system of quality control;
5. the education and training of assessors,
6. a formalized legal arrangement
(possibly the establishment of a new formal association).

THE CHALLENGE

Taking into consideration the following facts:

- that automobile clubs are linked through the international organizations FIA and FIM that cover mobility as well as sport,
- that automobile clubs seek to be key leading organizations that promote the safe mobility of road users and support motor sport,
- that rationalization, optimization, and financial and economic considerations are important aspects in the investment and construction of centres today,

Part of the challenge in the future may be in designing and building centres that contain training tracks for safe driving drills as well as a section for motor sport.

AMZS

INSTRUCTORS

 **1987**

AMZS

The team of AMZS Safe Driving Centre

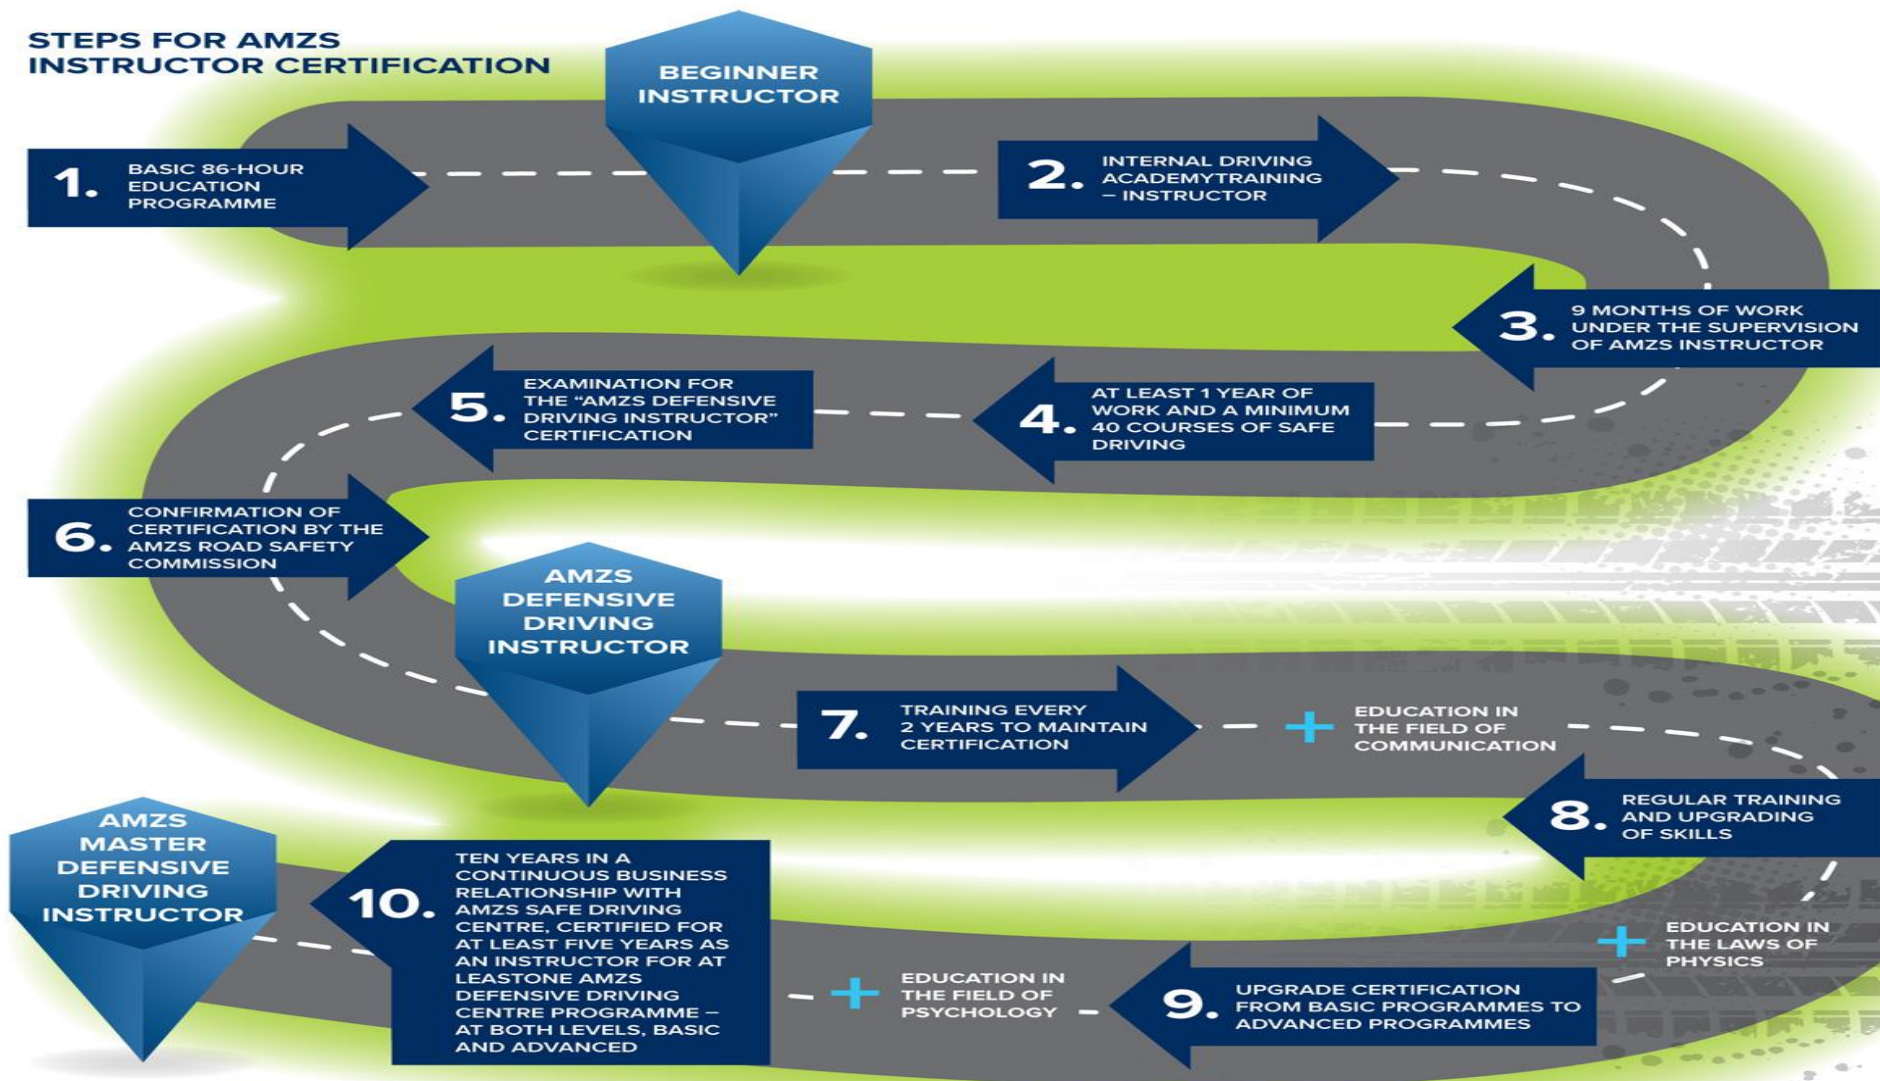

Instructors are **responsible** for preparing drivers for the road, to have respect for driving, training, and having the right attitude to driving, provide a solid foundation for ensuring that drivers live to drive another day.

Life is precious.

Therefore, we would **like to share our knowledge and experience with you.**

AMZS

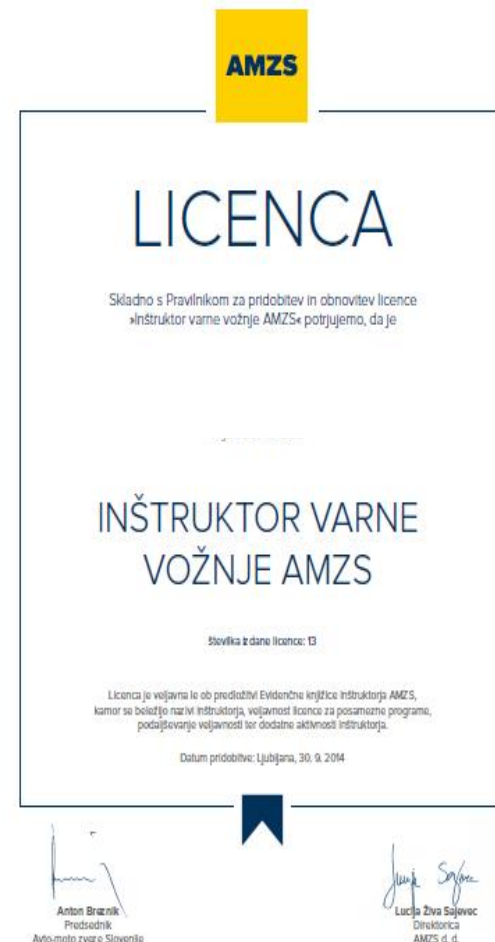

STEPS FOR AMZS INSTRUCTOR CERTIFICATION

AMZS instructor and license validity

Validity of the license: 2 years

- ✓ The Secretary of the Council for Road Traffic Prevention
- ✓ Head of the AMZS Safe Driving Centre
- ✓ 2 AMZS experts

Datum izdaje:
Ljubljana, 30. 6. 2015.

AMZS – Research and Development Centre

PURPOSE:

- ✓ Research of psychological, sociological and technical factors, and their impact on driving
- ✓ Research results are shared with everyone, with the aim of improving our programs

COOPERATION WITH:

- ✓ The Government and international institutions
- ✓ Universities
- ✓ European Organizations

Telefoniram IN vozim.
Zato reagiram prepočasi in imam dolgo zavorno pot.

Ne telefonirajte med vožnjo!
Uporaba mobilnega telefona med vožnjo realniški čas voznika podaljša za več kot eno sekundo, kar pomeni pri hitrosti 50 km/h več kot 15 m daljšo zavorno pot.

AMZS | Center varne vožnje
Varnost. Mobilnost. Sport.

**“Adaptability is the best strategy for the future.”
Charles Darwin**

We are always open and prepared to develop a **program**
tailored to your needs and created according to the
highest European safety standards.

AMZS

AMZS SAFE DRIVING CENTRE in VRANSKO

- ✓ We make sure that each participant acquires **more than he expected**.
- ✓ We strive to **continuously develop and improve** our programs.
- ✓ We maintain a very **high level of professionalism** by local and European standards, therefore we continuously **follow technological progress** and other **automotive development** as well as **driving techniques**.

Simulator Rosenbauer and cooperation with ÖAMTC

- ✓ Test of the **rollover simulator**, with instructions for **proper use of the safety belt** and instructions for rescue in the case of an accident;
- ✓ Test of a modern **car-driving-simulator** in which we can measure reaction time, driving skills and give tips on how to improve driving.
- ✓ Drunk glasses

- ✓ Disabled and BDF handle - **socially responsible**

- ✓ **AMZS is a partner with BTC, DARS in AV Living Lab** participating in developing solutions for self-propelled vehicles

- ✓ **Elaphe's latest electric propulsion technologies**

AMZS SAFE DRIVING CENTRE

- ✓ Safe driving courses **change** the way drivers see their own driving abilities,
- ✓ **speed becomes less important**,
- ✓ many drivers **lack knowledge** regarding the safety devices in their vehicles,
- ✓ buying additional **electronic safety devices** is the exception and not the rule,
- ✓ experiencing the effective use of these devices in a safe environment such as the Safe Driving Centre convinces even the most sceptical of people.

The key focus of all courses at the Centre is the prediction and avoidance of dangerous situations.
