# The beginning

Slovenian Traffic Safety Agency was established in 2010.

Vehicles Division was established from:

- Type approval department (Directorate of the Republic of Slovenia for roads),
- Technical inspection department (Ministry of interior) and
- Vehicle registration department (Ministry of interior).

# Vehicles Division

From 2010 the whole vehicle field is concentrated in Slovenian Traffic Safety Agency.

Operative work is divided from the legislation field, which is in Ministry responsible for transport.

In the Vehicles Division there are seven employees who are responsible for all three working areas.

We perform approximately 100 supervisions of our organisations.

We support the organisations with informations about how to correct perform different working procedures.

# Type approval system

Type approval system in Slovenia:

- the system was established in 1993,
- the system was established on UN ECE regulation system but we were recognized also EEC system,
- from 2004 Slovenia as the member states of EU, fulfils all EU requirements.

# Type approval and technical inspection history

- Ministry of science and education - type approval;
- Ministry of interior - technical inspection and registration (1993).
  
- Ministry of transport - type approval;
- Ministry of interior - technical inspection and registration (2001).
  
- Ministry of transport - whole vehicle field (2010).

# Type Approvals

We are dealing with between 100 and 200 representative offices, which are responsible for importing the vehicles in Republic of Slovenia.

We take care about the government system of issuing Slovenian national certificate of conformity and information system which contains version and variants of vehicles.

# Type Approvals

Before the Corona crisis we had approximately 150,000 new vehicle registrations yearly in Slovenia .

We are talking about:

- 100,000 new vehicles and
- 50,000 used vehicles.

In 2022, we have approximately:

- 75 thousand new vehicles and
- 56 thousand used vehicles.

# Registration of vehicles

In Slovenia we have 139 registration organisations and 58 administrative units, which perform procedures of registration of vehicles.

We have registered 1,8 million vehicles in Slovenia. Here are performed approximately 2,5 million procedures each year.

# Technical inspections of vehicles

In Slovenia there are 105 organisations, which perform periodical technical inspection of vehicles in Republic of Slovenia.

We have 1,8 million of vehicles in Slovenia and this technical services perform more than 1,5 million PTIs per year.

# Technical inspections of vehicles

	2020	2021	2022
The number of registered vehicles	1.701.336	1.737.194	1.775.873
The number of PTI	1.477.132	1.510.885	1.534.523
The number of faultless vehicles	1.207.566	1.238.280	1.250.847
The number of conditionally flawless vehicles	170.892	185.250	198.752
The number of vehicles with faults	73.111	64.768	63.177
The number of vehicles with critical faults	25.563	22.587	21.747

# IT System

We also take care about IT system of vehicle type approvals.

With our provider we perform upgrades on the system and take care that the procedures are user friendly.

# IT System

Our IT system is divided in two ways:

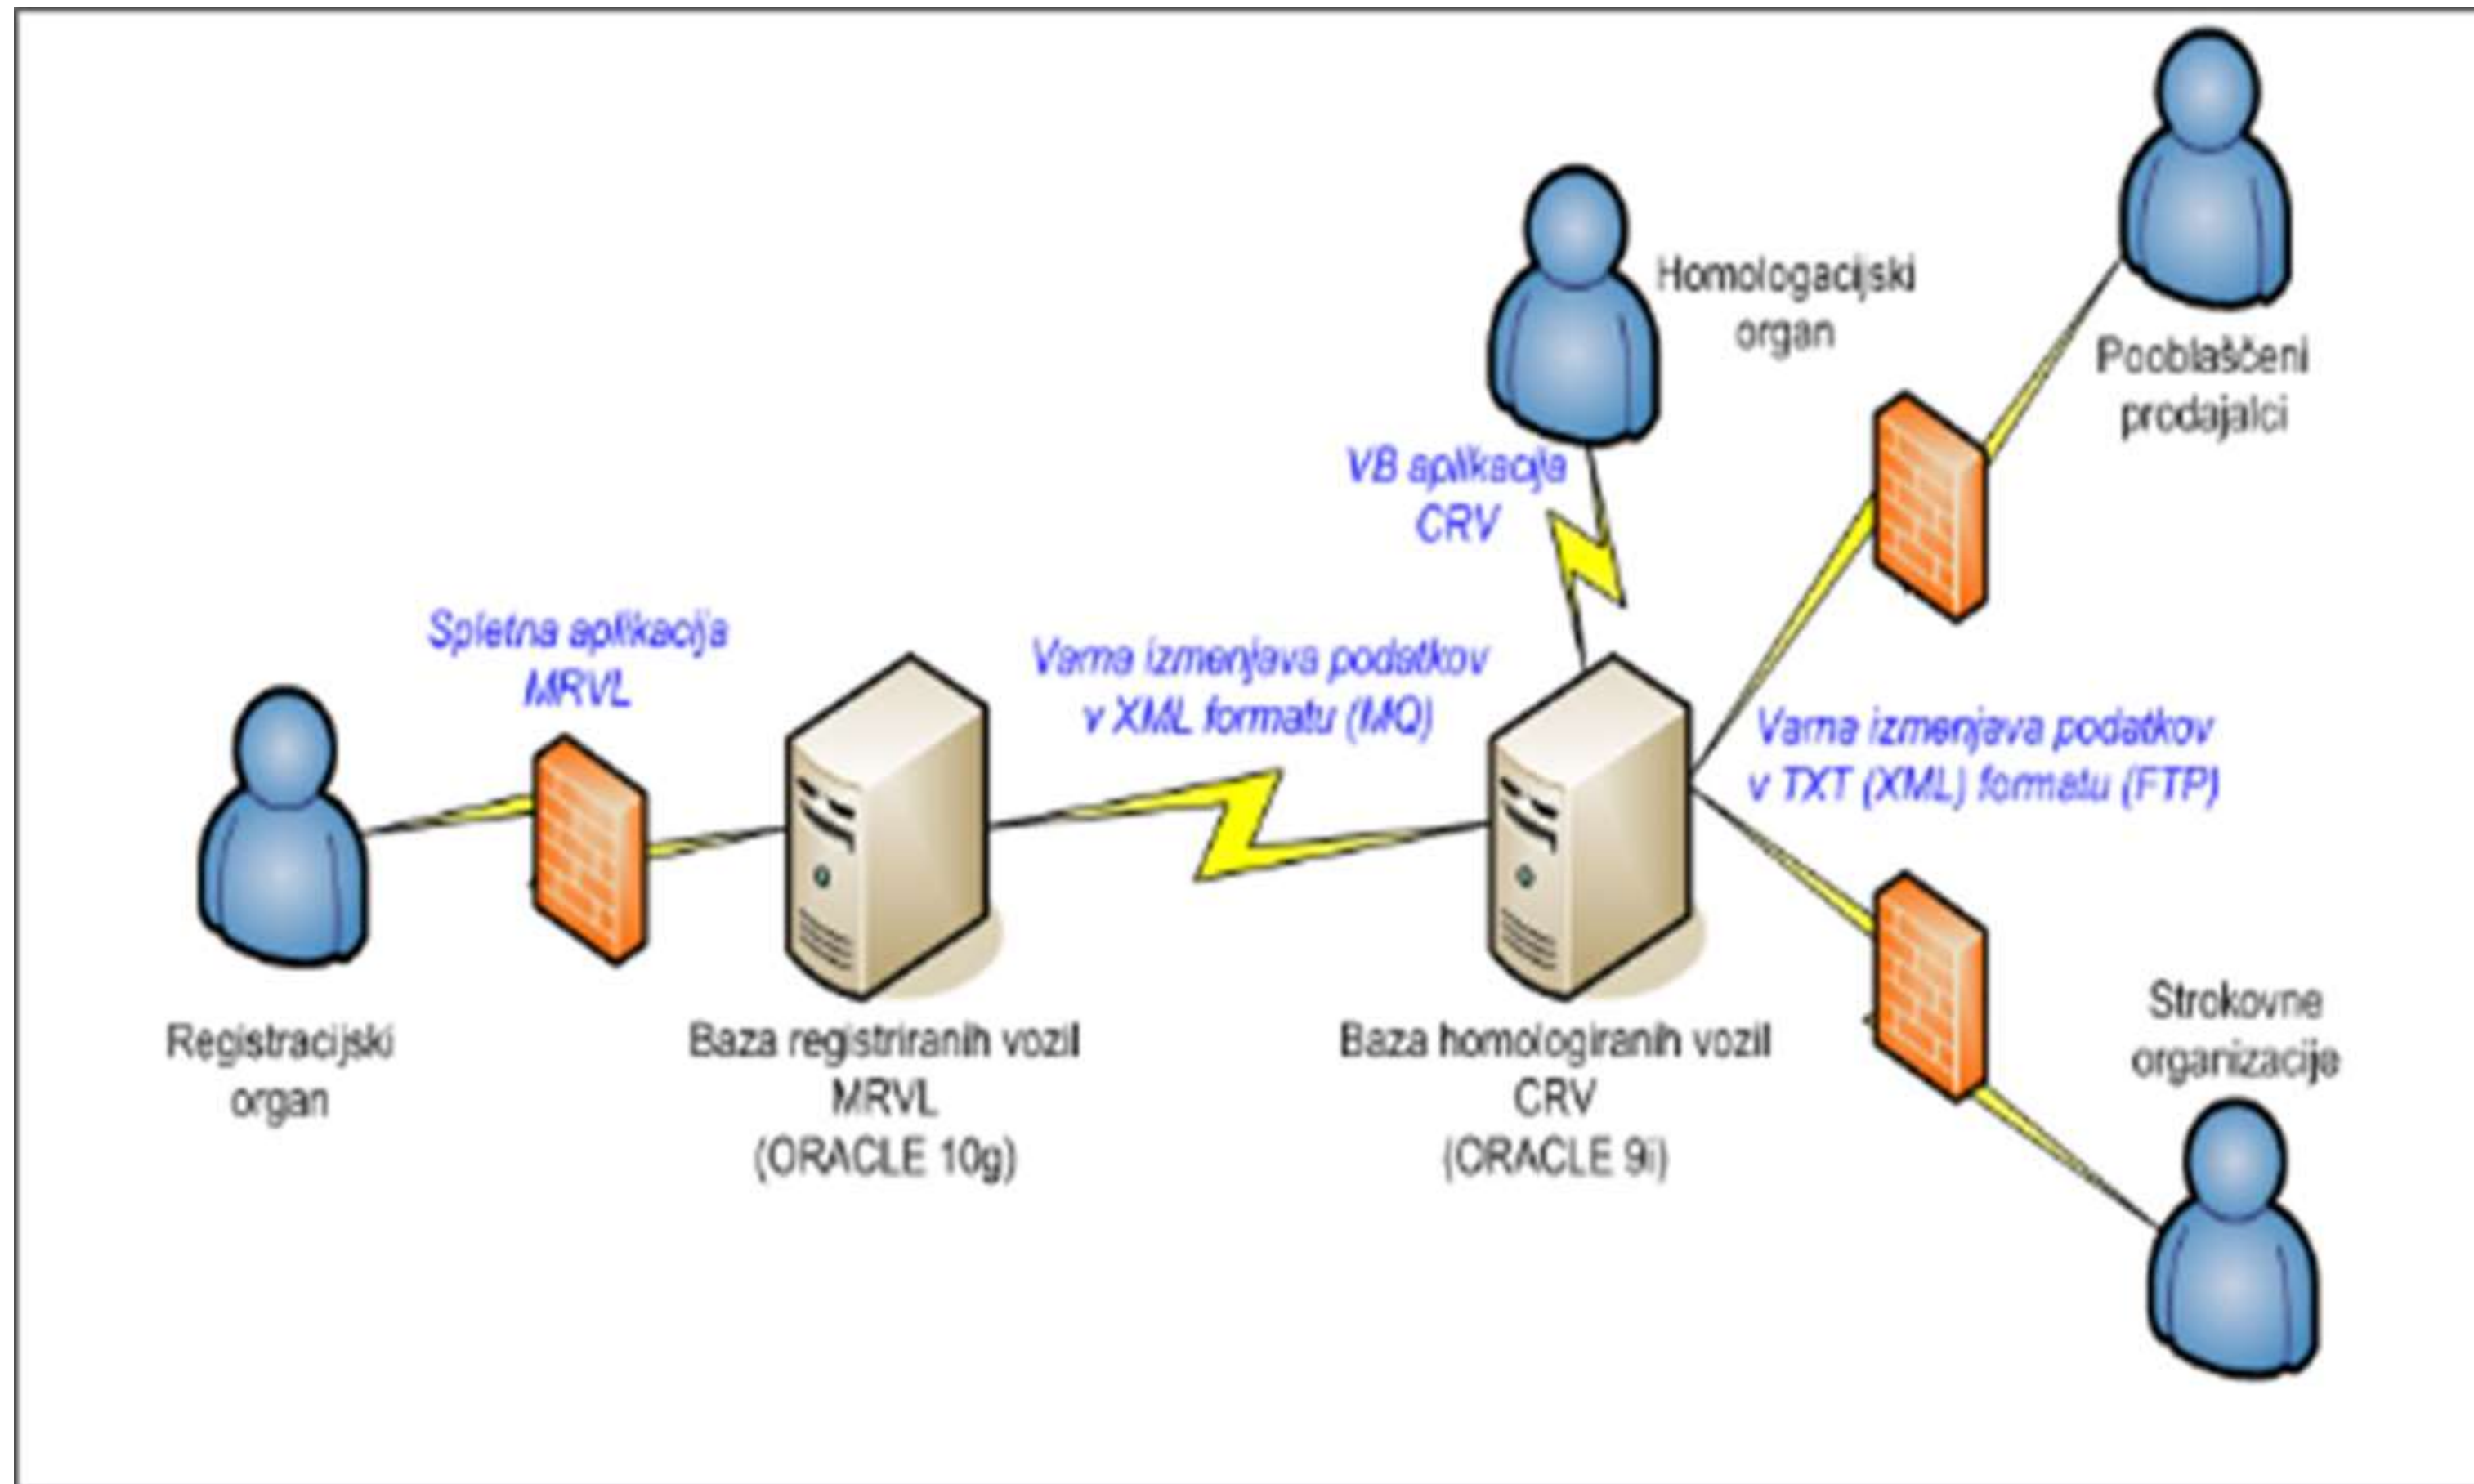

1. Type approval system (Centralni register vozil – CRV) where each vehicle get Slovenian certificate of conformity; The responsibilities of this system is on the Slovenian traffic safety agency;
2. Registration system (Matični register vozil – MRVL) where each vehicle is connected also with owner of vehicle; For this system is responsibility of Ministry responsible for transport.

# IT System

This two system are connected and each vehicle for which is issued Slovenian certificate of conformity are imported in MRVL on-line.

After that import the data into MRVL there is possible to make registration of each such vehicle. It means the vehicle is connected to owner of the vehicle.

# IT System

Thank you for your attention!
