6. Contract description

The Transport Community is currently operating a complex GIS-based system relying upon a Relational Database Management System (RDBMS) and ArcGIS Pro with linear referencing functionality (TODIS). The scope of the services consists in upgrading the information in the database and preparing thematic maps in ArcGIS Pro, as following:

- Services to be delivered in 2025:
 - Uploading the TEN-T networks road, rail and inland waterways of Georgia, the Republic of Moldova and Ukraine in TODIS Geodatabase based on the shapefiles to be delivered by TCT and split the linear networks into individual sections.
 - Associating specific attributes to each section of the linear networks (road, railway, and inland waterways)

- Uploading TEN-T road and rail projects in Georgia, the Republic of Moldova and Ukraine in TODIS Geodatabase based on the shapefiles to be delivered by TCT and associate attributes to each project (if case)
- Prepare a number of thematic maps in ArcGIS Pro based on the attribute values
- Services to be delivered in 2026 (upon specific instruction from the Contracting Authority):
 - Updating the attributes for the previously delivered network sections and projects
 - Uploading new TEN-T road and rail projects in Georgia, the Republic of Moldova and Ukraine in TODIS Geodatabase and associate attributes to each project (if case)
 - Prepare a number of thematic maps in ArcGIS Pro based on the updated attribute values
